

VALLEY WEST HOSPITAL & MEDICAL OFFICE BUILDING

Project Description

CLIENT: Valley West Community Hospital

LOCATION: Sandwich, Illinois

COMPLETED: 2007

DESCRIPTION: Scope of services included municipal street extension, pavement design, cost estimating, sanitary sewer design, drainage analysis, storm sewer design, detention pond design, and watermain design associated with the hospital building addition and also with the construction of a new medical office building. Duties included preparing the necessary documents to receive permits from the Illinois Historic Preservation Agency, the Illinois Environmental Protection Agency, and the municipality. Services also included meeting with contractors, officials from public and private agencies and developers to review their needs and requirements and make recommendations based on sound engineering principles.
