

COLOMA TOWNSHIP PARK DISTRICT BOWMAN PARK

Project Description

CLIENT: Coloma Township Park District
Mr. Michael Sterba / Director
815.625.0272

LOCATION: Rock Falls, Illinois

COMPLETED: 2009

DESCRIPTION: The Coloma Park District hired Wendler to revitalize an existing park along the Rock River that was in need of a facelift and fresh look.

The project incorporated the existing limestone walls and sidewalk edging to outline a new sidewalk design using colored pavers. New lighting highlighted the park that featured a circular raised planting.

The area around the raised planting area and the perimeter of the courtyard will be lined with benches that local residents purchased in remembrance of loved ones.

The park will ultimately connect to a recreational path along the Rock River that will be an integral feature of the Rock Falls Riverfront.
