

# DIXON PARK DISTRICT EMMA HUBBS TENNIS CENTER

## *Project Description*

CLIENT: Dixon Park District  
Ms. Deb Carey / Director  
815.284.3306

LOCATION: Dixon, Illinois

PROJECT COST: \$210,000

COMPLETED: 2008

DESCRIPTION: All six courts on this popular tennis complex were constantly being used by the high school tennis team and local recreational tennis players for sport recreation, training instruction, and tournament play even though the surface was cracked and delaminated as a result of the extreme northern Illinois winters.

Wendler Engineering Services, Inc. was hired to prepare plans to reconstruct the site. Design included restoring the proper tennis court dimensions and elevations. Site grading included construction of underdrains to stabilize the sub-grade prior to placing aggregate base and hot mix asphalt surface. The project also included installation of special surface coatings specific to tennis courts, striping, posts and nets.

In addition, Wendler prepared plans and specifications to furnish and place new chain link fence around the enclosure and also to provide sidewalk and parking in accordance with ADA guidelines.
